Just like with face to face engagements, I find teachers participate in discussions that are relevant to the work they are doing with students. They use the boards to ask questions or solicit feedback; they engage when they find value in what is being discussed. With regard to keeping people interested, I think discussion facilitators should ensure responses are provided in a timely fashion. Celebrating accomplishments is also a great way to build community and keep people interested in what their colleagues are doing.

Melissa, great thoughts on celebrating work through the discussion boards! Creating a community that showcases best practices, and supports end users, will definitely keep all community members engaged.
