

## Filtering in the WeTeachNYC Library

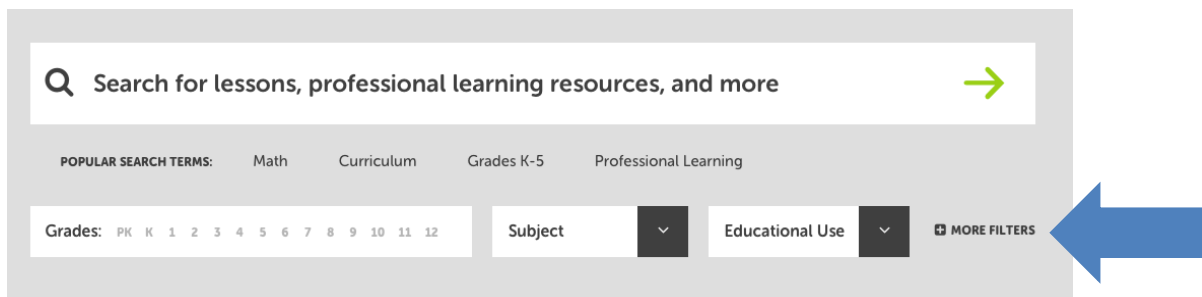

Here's what you'll need to know to quickly and easily filter search results in the WeTeachNYC library. Filters narrow down your search results by only displaying resources that match the selected criteria. Use as many filters as needed, and add or remove filters to instantly change the results listed.

Filters may be used either before or after a search has been performed and appear directly below the search box on both the home page and the library landing page.

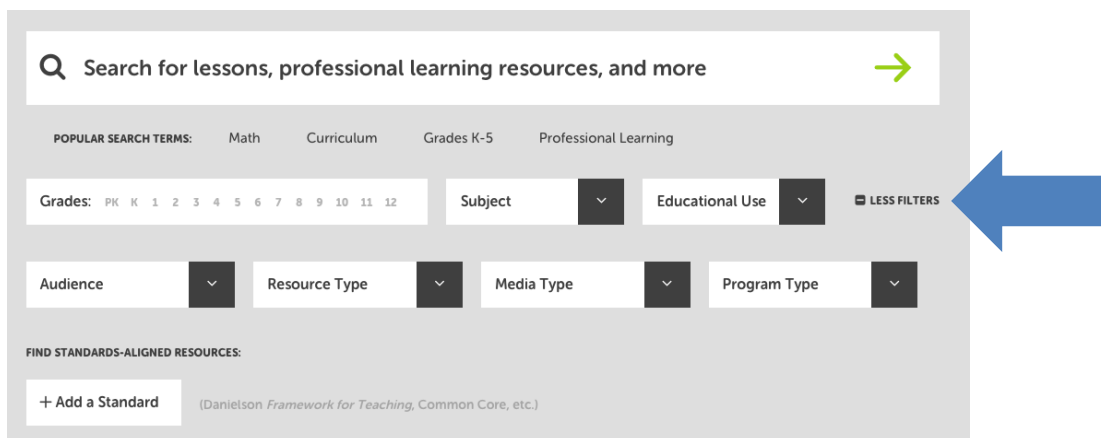

Filter categories include:

- Grade (Pre-kindergarten through 12th)
- Subject (mathematics, science, social studies, etc.)
- Educational use (assessment, curriculum/instruction, professional development)
- Audience (teacher, administrator, instructional coach, etc.)
- Resource type (case study, curriculum guide, formative assessment, etc.)
- Media type (application, document, video, etc.)
- Program type (Showcase Schools, Transfer Schools Common Core Institute, MSQI, etc.)
- Standards (Common Core, Danielson Framework for Teaching, Quality Review Indicators.)

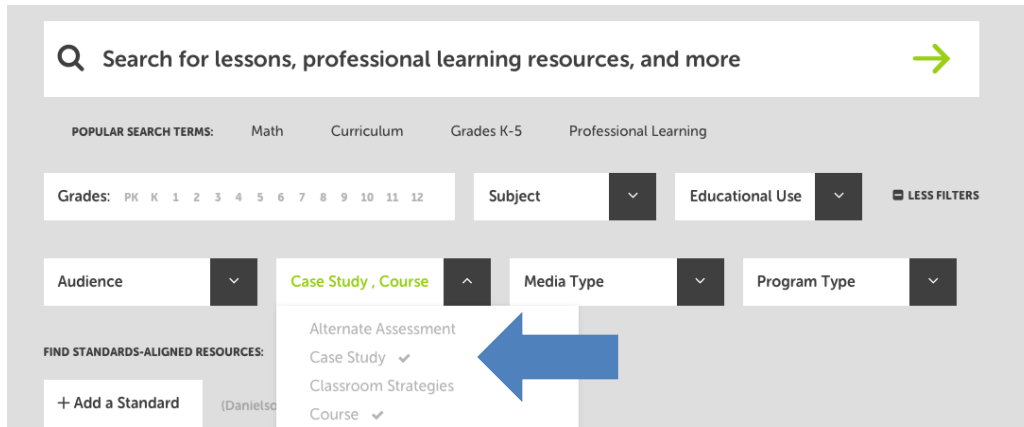

The 3 most common filters are always visible. Additional filters can be accessed by clicking “more filters” which appears to the right of the page.

Additional filters can be collapsed by clicking “less filters.”

Select filters by clicking on the dropdown arrow of the filter you wish to use. Click on the options you wish to apply. Once an option is selected, a check mark will be placed next to it. Click it again to uncheck it.

FIND STANDARDS-ALIGNED RESOURCES:  
+ Add a Standard (Danielson Framework for Teaching, Common Core, etc.)

Once clicked, a pop up box will appear. Select the set of standards you wish to filter by and then select the individual standards. Selected standards appear in green with a check next to them. Click them again to uncheck the standard.

Filters that have been selected will display as green. In order to get rid of all of your filters, click “clear filters” which appears at the top of the results in green.
