

Sharing Resources in WeTeachNYC Classes & Communities

Some communities allow members to share their own resources. If your community allows this, once you enter the community, you will see a section that says “Resources.”

Click on the folder in the “Resources” section to view all the resources it contains.

To add your own resource, select a folder, and click “Add New.” Depending on the permissions the group owner has given, you will be prompted to select either a link, a file, an idea or a discussion.

Select “Disable Sharing” to prevent other community members from sharing this resource outside of the selected community. This is a good choice for sensitive content like lesson plans or student work.
