# Saving Resources and Collections on WeTeachNYC

To save a resource, first login with your NYCDOE or partner credentials on the WeTeachNYC home page (weteachnyc.org).

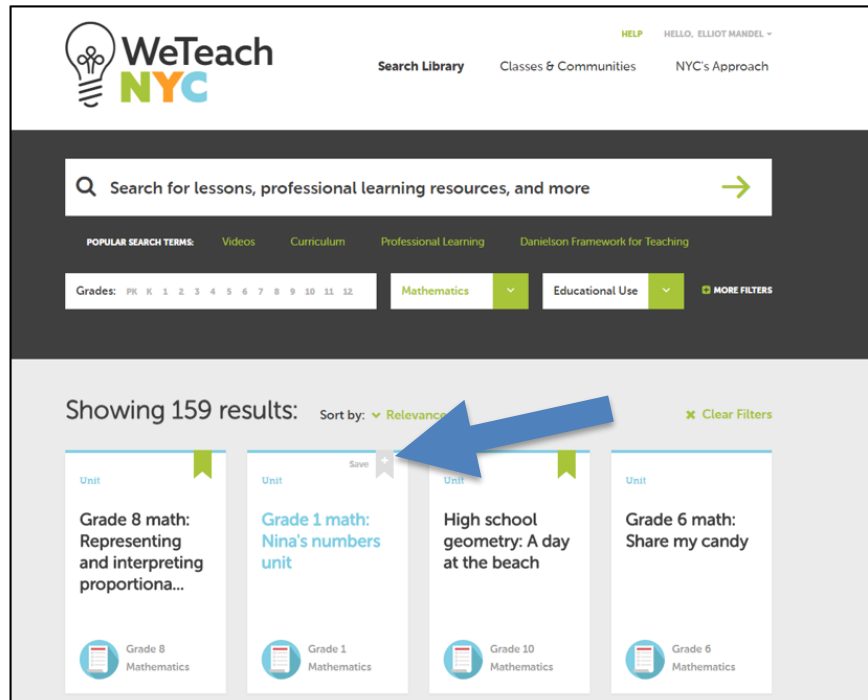

Search the WeTeachNYC library to find a resource or collection you would like to save.

Hover over the individual resource or collection you want to save. A gray "Save" bookmark icon will pop up. Anywhere you see a gray bookmark, you can save a resource or collection.
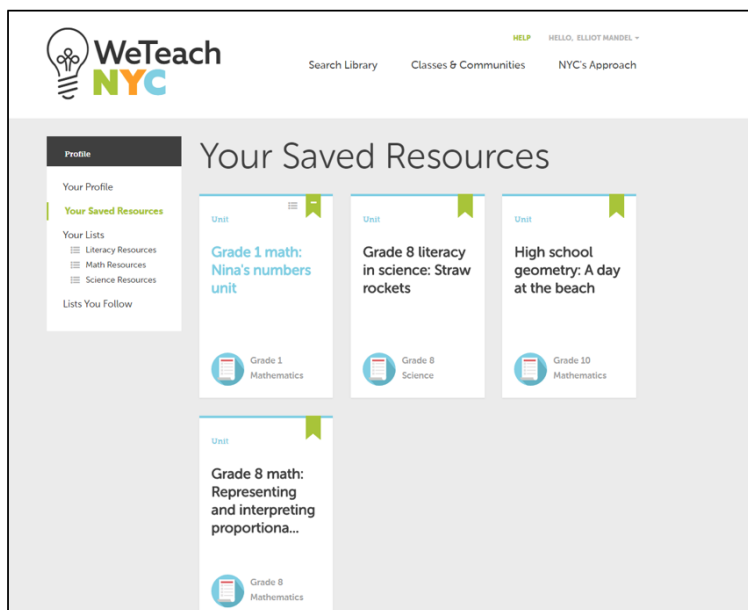

Clicking this icon will save the resource or collection to your profile. The bookmark will turn green to indicate that the resource has been successfully saved.

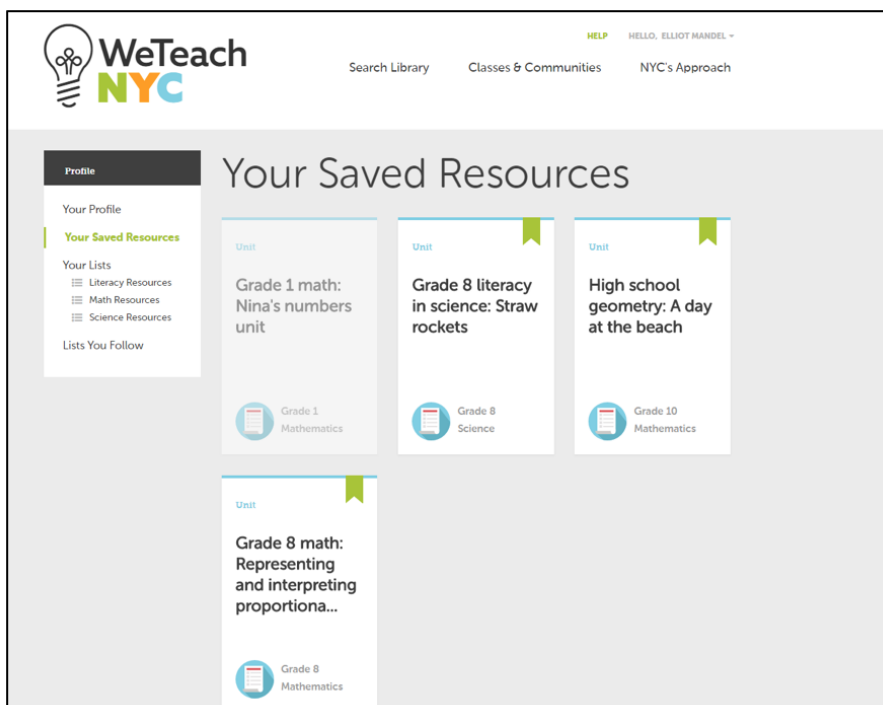

You can save a resource or collection from both the search page and the details page. The same gray bookmark appears on the details page. To save a resource from the details page, click on the resource, and then click the bookmark, which will turn green.

If you return to your profile and select "Your Saved Resources", you will see all of your saved resources.

If you decide you no longer wish to keep a resource, click on the green bookmark. The bookmark will disappear and the resource will fade. Refreshing the page will make the unsaved resource disappear. If you unsaved accidentally, however, just hover over the resource and click the bookmark again.
