

## Attaching Files, Links and Videos to Discussions and Replies

Attach a resource to your reply by dragging and dropping the resource into the file attachment box just below the text box or by clicking on the words **‘from your computer’**, which appears just below the text box.

The screenshot shows the 'WeTeachNYC Sample Community' interface. On the left, there are three sidebar sections: 'COMMUNITY GOAL' with an 'EDIT' link, 'NEXT STEPS' with an 'EDIT' link and two bullet points, and 'TAGS' with an 'EDIT' link. The main area is titled 'Discussions' and features a 'Sample Discussion Title' with an 'Edit Title' link and an 'Add a Tag' button. Below the title is a text box containing 'Here is my first prompt.' and a dashed box for attachments with the text 'To attach a file, drag & drop it here or select it from your computer. Or add a video or a link.' and a large blue arrow pointing left. At the bottom of the main area are 'POST REPLY' and 'CANCEL' buttons.

Files, links, and videos automatically inherit the tags from the discussion they are attached to so community members can find them easily.

If you upload an image, it will appear inline in your reply, as well as appearing as a discrete resource.

Add a video by clicking the text that says **‘add a video or a link’** just below the text box and pasting the URL in the space provided to a publicly viewable video from sites such as Vimeo. You can add any external links by clicking the same text.
