Deleting Tags

To delete tags from a specific discussion or resource, click the small blue '**x**' next to the tag you wish to delete. This removes the tag from the menu. Only facilitators can delete tags.

To delete tags from the overall community, go to '**EDIT**' in the tags section of the left-hand navigation bar. When the tag menu appears, hover over the tag you wish to delete and click the trash can icon. You will get a warning reminding you that any discussions, files, or videos that have this tag attached to them will have the tag deleted. This uncategorized content can still be found in '**All Resources**' or '**All Discussions**'. If you still wish to delete, click '**Yes, Delete**'. If not, click '**No, Cancel**'.
