

Discussion Analytics

Under **'Discussions'**, you can get information about how many replies there are for a given discussion, how many files, links, or videos are attached to it, and how many times the discussion has been viewed. These data can be viewed for a specific time period by clicking the calendar at the upper right-hand corner of the screen and picking a date range.

Analytics 05/08/17 - 05/17/2017  **EXPORT**

Discussions

TITLES	REPLIES	FILES	VIEWS
End of Session Reflection	2	1	2
Bridge to Practice	1	0	2
New Discussion Title	2	2	1
Welcome and introductions	0	0	1
test	0	0	1
Session 1 Reflection	0	0	1
6 Total Discussions Started	5	3	8

To export this data to a CSV file so you can use it in Excel, set the date range you want and then click **'Export'**. This will prompt you to save a CSV file to your computer.

Facilitator Tip:

Data about discussions can help you to identify areas of interest for community members, do a quick check on members' pre-work, and see which conversations taking place during or between sessions are most popular.
