

Removing Community Members

To remove community members from a community, go to **'Members'** in the left-hand navigation bar and click **'See All'**. A list of community members will appear. To remove a member, click the checkbox next to their name and then click **'Remove Selected'**. If you are sure, click **'YES, REMOVE'** and the member(s) will be removed from the community.

The screenshot shows the 'WeTeachNYC Sample Community' interface. On the left, there are sections for 'COMMUNITY GOAL' and 'NEXT STEPS'. The main area is titled 'Community Members' and displays a list of members with checkboxes. The member 'John Dewey' is selected. Below the list, a confirmation message asks 'Are you sure? The user's posts and files will remain visible.' A green button labeled 'YES, REMOVE' is highlighted with a blue arrow. At the bottom, there is a dashed box containing the text: 'To add community members, drag & drop a CSV file here or [select one from your computer](#).'

Please note that the community member's posts, files, links, and/or videos will still be visible after they are removed from the community.
